Why Plants by Laura?

Handmade micro clay plant terrariums have been my passion for almost 5 years now. I started with selling premade micros at shows and online.

Through feedback and research, I realized a DIY kit would offer an experience with my tiny waterless gardens, expanding on the joyful reactions I've gotten through the years.

Each kit is unique and one of a kind.

Every tool needed is included as well as a detailed instruction sheet.

I have sold well over 1000 micros and as of this presentation, about 200 kits.

Take a look at what makes these kits so special >>>

Offer Customers Real Art

Inspired by popular mini craft kits, these handmade micro clay plants give a whimsical craft experience with handmade elements.

Included in each kit:

- 25mm glass terrarium
- assortment of handmade plants
- mixing dish
- tube of water-based glue
- mixing stick
- cleaning swab
- plastic tweezers
